

Essential Album

Professional albums for a lifetime of memories

Why do you need an album?

Although we offer digital files, they are only meant to be a temporary method of storage. Too many things can go wrong with digital media - leaving you with files that may never be printed, displayed, or enjoyed!

When you want to revisit your wedding day with family, friends, or future generations, we don't want you to have to scroll through Facebook albums, search your Instagram, or check every drawer in your home for a USB drive. We want you to have something you can find easily, open without a password, hold on your lap, and be transported back to your special day.

Why choose a professional album?

We offer every couple a timeless reminder of their most joyful moments from the wedding day - a beautiful and high-end wedding album that will last for years to come.

We know that when we say "photo album" many visuals come to mind - you may think of a parent or grandparent's wedding album that you treasured looking at. You may also think of the photo book that was on sale on Black Friday from a website that also sells cards, mugs, and blankets. These are two very different visuals with great differences in quality, price, and expectations.

Our professional albums come with a lifetime warranty and a natural disaster warranty so your memories remain protected, even if something happens. This piece-of-mind is only available when you purchase a professional album.
